

MANUFACTURING CAPABILITIES

As the industry's leading developer and manufacturer of scientifically proven, state-of-the-art skin care products, Cosmetic Solutions is the choice partner for established and emerging brands in the medical, cosmetic and retail skincare industries worldwide.

Backed by cutting-edge technology and world-class research and development, we offer superior customer support services including packaging, formulation, graphic design, manufacturing and delivery. From concept to shelf Cosmetic Solutions is your comprehensive solution for the most cost effective, high quality and results-driven products on the market.

MANUFACTURING EXCELLENCE

Our team approaches all manufacturing projects with excellence. That means that all jobs - both complex and simple - are engineered with cost, speed, flexibility and practicality in mind. A heavy emphasis is placed on quality control at all stages of the manufacturing process to ensure you get your product to market on-time and on-budget.

- Stainless steel mixing and holding vessels, as well as jacketed kettles, pumps, filters and other specialized equipment are used in our production facility
- USP grade raw materials are used whenever available, to ensure the highest product quality
- Performance-proven ingredients only
- Scalability is easily achieved
- Ongoing training programs are in place for our staff to maintain manufacturing excellence
- Low minimums or large scale production with fast turnaround are available

STATE-OF-THE-ART FACILITY

Our processes are GMP compliant, governed at every step by detailed SOP's which cover:

- Facilities and equipment
- Components and closures
- Raw materials and production processes
- Sanitization and maintenance,
- Packaging and labeling controls

SUPERIOR PRODUCTS

- Our extensive library of proven product formulations is available for immediate private label production in finished packaging, or in bulk
- Medical grade formulations are results-driven and highly effective for all skin types and beauty concerns
- Available products and textures include serums, creams, gels, ointments, foaming products, masks, cleansers, sun care and specialty products
- Custom formulations can be created according to client specifications
- No animal testing of products or use of animal derived raw materials

QUALITY PACKAGING AND LABELS

Cosmetic Solutions offers numerous types of packaging services:

- High-speed filling, capping, labeling, batch coding and shrink wrapping
- We use a variety of automated and semi-automated packaging equipment
- A large range of packaging components are in stock and available
- CS continually sources additional alternatives based on client specific needs
- A team of highly skilled, on site, graphic designers are available to assist customers in the creation of stunning labels for both interior and external packing components
- Extensive decorative options available, including labeling, silk screening, and hot stamping
- Turnaround greatly exceeds industry standards

STREAMLINED SHIPPING

With extensive shipping experience, ranging from small package shipments to international container shipments we enjoy high customer satisfaction due to on time and undamaged delivery.

- The completed product is packed into shipping cartons for solid transport
